From the President Desk

This time's year we were reflecting on a remarkable level of momentum in the service movement and the work of SAMIDA.

At the start of 2019 we reached many milestones that had originally seemed far off, such as the orphan care in the Tribal regions and we were looking towards the future with a sense that the consensus on education and HIV prevention action was nearing a positive tipping point

Optimism assumes all will go well without our effort; pessimism assumes it's all irredeemable; both let us do nothing...that results are either immediate or they're nonexistent. That if you don't succeed straight away, you failed. Such a framework makes many give up and go back home when the momentum is building and victories are within reach.

Many seeds were planted in 2018 that are already blossoming. There were a number of new victories in our journey on service, thanks to our donors who have had their support, which is remarkable given how cooperative is being exposed to the service mandates.

We reflect on 2018 with all of this in mind. We're learning which services are attracting new and more diverse participation; and our window for action just got broader. This work requires new clarity of purpose, new speed and scale in our commitment to our mission, and a wider set of alliances.

Like many organizations, we have been very blessed by our donors and supporters who have made it clear that they intend to help us do this; to stand with us during this time. As you read this report, you'll see what your investments in our work have achieved thus far, and you can see glimpses of where we head next.

With deep gratitude and resolve,

Mr. Padala Ramana
President 00
Sanga Mithra Development Association (SAMIDA)

Introductory message of Executive Secretary of the organization

Greetings Fellow fraternity,

It is my esteemed pleasure to welcome you to the SAMIDA and I am honoured and humbled to serve as your executive Secretary.

The mission and goal of the SAMIDA are to facilitate, promote, develop, and support emerging scholars as they transition from graduate Community's to professional scholars. The SAMIDA is committed to helping communities navigate the obstacles, challenges, and unknowns; celebrating successes and rewards; and supporting and expanding the networks of our development lives.

As your Secretary, I am committed to leading our organization with transparency and vulnerability. To catalyze our success as Community's, I also hope to offer more Community involvement throughout SAMIDA, provide open access to information, support our graduate Community division leadership, and continue to grow our Community support network with horizontal and vertical mentorship. I aim to create an environment where we as Community's can support each other and hold our organization accountable while expanding the graduate Community council towards new opportunities.

With the upcoming 2020 theme, "The Power and Possibilities for the Public Good When Stakeholders Collaborate", we are expecting to engage Community's holding multiple identities as future leaders in meaningful and diverse conversations on topics related to political, public, and community policies. As we prepare for 2020, we will work to unite our Community population under this opportunity to join together and create new spaces where we can collaborate, problem solve, and engage others through our research, scholarship, and leadership.

I encourage you to explore the themes and subthemes as you seek ways to get involved within the SAMIDA the Community in to bring you events, programs, and services at this year's annual conference. As underprivileged I proclaim that Community's, we are the foundational future of SAMIDA. You, your voices, your presence, and your multiple identities as future leaders are welcome.

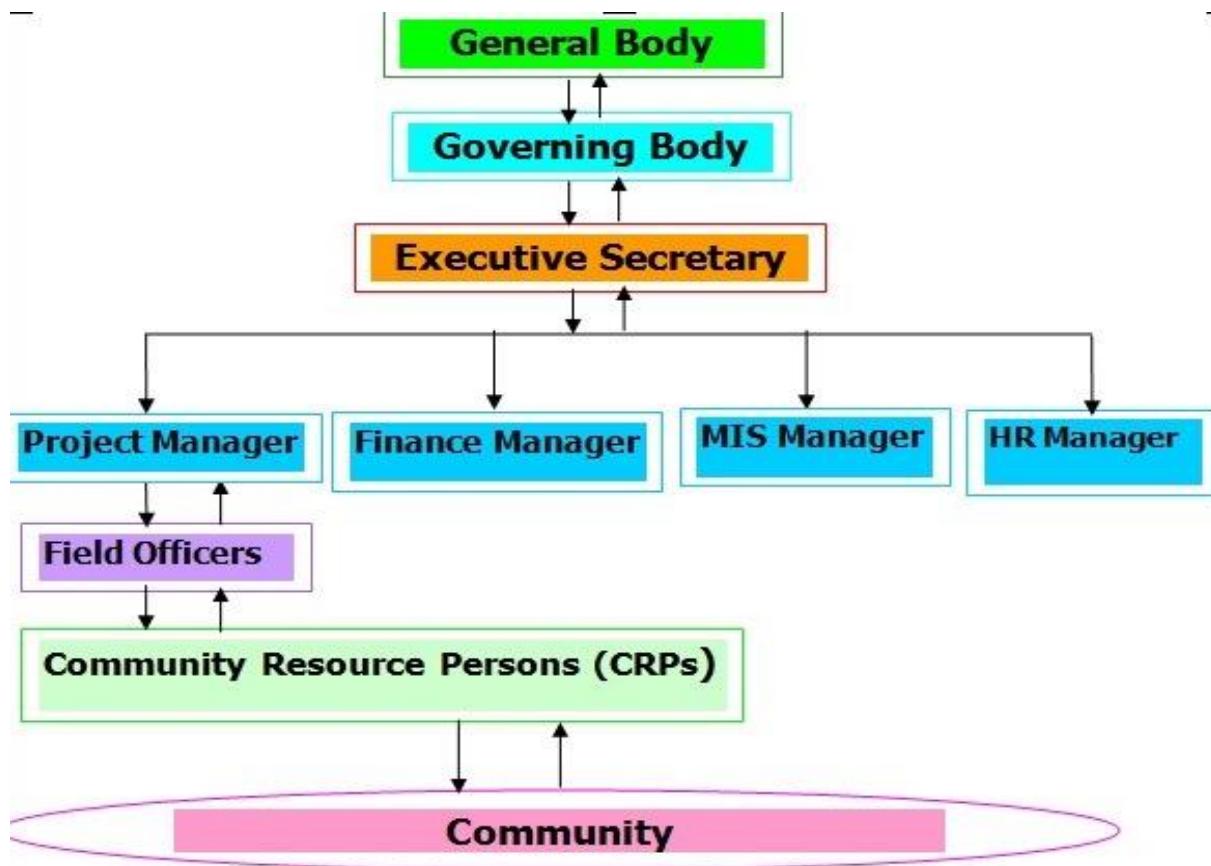

Sincerely,

D.Veerabhadrarao
Executive Secretary
Sanga Mithra Development Association (SAMIDA)

List of governing body members

Governance Structure and Organizational Chart

Premises of interventions

The esteem of SAMIDA is in the fronts of health, education, economic and social up-lift of deprived and augmenting the income generation and capacity building programs for sustainable livelihoods, designing agrarian models, disaster preparedness, and environment protection and fostering climate change. A special attention is in place to safeguard and protect the women and children from ill-effects of changing scenarios of expansion of urban neighborhood, expanding slums and deteriorating family structures, Development and expansion of cooperative movement by fostering the CBO's, SHG and MACS institutions especially with the marginalized and peasants, women farmers and vegetable growers, daily wage earners and initiating them into thrift and savings.

SAMIDA implements several community development programs, which are centered on the thrift and credit, household micro enterprises, farmers and women cooperatives and on right of the communities. This provides them a platform. Planning takes place in a participatory manner. All the staff members involve in the planning process and Secretary provides required guidance during the planning meetings. SAMIDA plays an extensive Media Advocacy and outreach on Tribal Children Rights and leverages in accessing the rights as per sub plans and legislations and organizes the Care & protection services to PWD, HIV infected & affected, nutrition services towards providing better health, societal harmony, child welfare, well-being and rights education for all associated with us and along with it the youth/women/Adolescent/child advancement and empowerment, gender rights.

Key objectives

- The objective is organizing vulnerable communities into organized groups and institutions which would act as leveraging source of linkages and establish the Support & nurture to mobilize resources and enable them as sustainable entities.
- Formulate sustainable models in vocational and occupational preparedness, income generation and promoting human resources and advocate for replication and scale up.
- Enable the communities to devise the linkages and accesses during distress and during the times of calamities and negotiate with different agencies for strengthening the community efforts
- Promotion of Community based organizations like-Self Help Groups (SHGs) for savings, and accessing micro credit for micro enterprise and entrepreneurship development and federation of such SHGs into MACS cooperatives
- Formation of Small Farmer Producer Organizations (SFPOs) for different agriculture commodities
- Promotion of cooperatives/business enterprises among artisans of various products
- Promotion of community health projects namely child nutrition, maternal care, disability welfare, sanitation, personal health and hygiene, HIV/AIDS prevention, cure, support services

Major programs undertaken during the period 2019-2020

1. ***Target intervention project for high risk group community (female sex workers and also MSM) supported By the APSACS- Vijayawada, Andhra Pradesh:***

Enhanced scope and ambit with the introduction of the present migrant strategy of including focus on source districts to Destinations the system could well be maintained as the Program for Cooperative Cataloguing in which the Potential HRG, returnee HRG, spouses of HRG mainly women and stakeholders are covered through Providing information, linkages to services for HRG and their partners at source, Strengthen linkages, Improving access to other social and development agencies and programmes to reduce vulnerability among targeted community, deep sea fisheries, stone quarries, brick kilns, Laborers Spread out across the City like Construction, Hotel Services, domestic work etc.

The High Risk Behavior ranging from consumption of drugs & alcohol high risk heterosexual and plural sexual relationships and lack of awareness, knowledge and safe sexual behaviors relating to STI/STD/RTI will make their reasons associated for the project operation. 2-4 times more number of HRG has non-regular partners or visit sex workers, and the prevalence consistently is more than one percent.

The outreach planning for the ORC for the current year worked out and the PE wise planning is being devised with the given parameters of enrolment registers, regular meeting and follow up of the HRG, identification of high risk and vulnerable zones, HRG master sheets with individual details and typology Etc. This apart the organization has pinned a large portion of the hope on the individualized involvement of the peers in accelerating the pace of the program. The peer education (PE) is routed through the VPL and multi-faceted component and its future plans are to extend the outreach so as to make the peer education to per grouping enabled.

SAMIDA has already been the implementing partner of targeted intervention all through the NACP III working with all the components of behavior change communication, enabling environment, condom promotion, STD treatment and extensive community mobilization in a bid to effectively organize the intervention. In this attempt the NGO has developed well established theatre for development, IEC material, IPC strategies and host area specific multi-pronged strategies along with Kalajatha.

The challenges are Coverage, Care and Support, Stigma and Discrimination, Enabling Environment and to counter all these proper strategies applied are scaling up and monitoring quality of Coverage, strengthening Enabling Environment, Enhancing access to services for Care, Support and Treatment, Strengthening the services under STI Management, Increased awareness and widespread communication strategies and bringing focus on Mainstreaming activities.

Major Activities covered under this project.

- Counseling support
- RMC (Regular Medical Checkup)
- STI treatment
- ICTC services
- Condom distribution and social marketing.
- Convergence with DLO, DAPCU, and other line depts.

- Advocacy and lobbying
- Crisis management and support services to HRGs.
- Capacity building to the target community
- Positive follow up
- Linkage with government schemes to the target community

➤ **SITE Wise Coverage and Categories of the HRGs**

| | | 593 | 440 | 19 | 103 | 43 | 4 | 1202 |

In this project we have organised the some of the events by the guidance of the APSACS & NACO with the support of Project officer -TSU & DAPCU-team.

Candle Light Memorial Day Event:- The SAMIDA-TI has conducted the event of International Candle Light Memorial Day at 18th May 2019 Narsipatnam. In this event we have associate with have hospital Nasipatnam staff and ICTC & DSRC counselor's all health depertments & ASHA workers. In this event 65 target community have participated and all the participants are made to take an oath to extend compatriatism to the martyrs of HIV and the program ended with all the participants marching from Govt Hospital to NTR stadium and Abid center with candle lights and distribution of water packets and snacks & Tea to all participants.

Further changes in the population of the target group are not visible excepting that almost all are not getting tested and confidence and composure are not apparent as a result of ill treatments and non - increase in knowledge and awareness levels. In the line of order the participation level of the stakeholders like family, peers, siblings etc. is not very promising and knowledge levels are not

grading as well as not inducting other neighbors is apparent in the project areas of Visakhapatnam of Andhra Pradesh. The amazing aspect is that the information as to the treatment is not being made available and the multiplicity of the likelihoods are surfacing to link up to the likelihood of spread.

Attitude of infected community on positive behavior is not showing up the results In-house orientation on attitudinal aspects are not pacing up to the demand for personalized attention on the grass root functionaries and the community has failing to identify the progress of the inputs in relation to the collaboration of government line department functionaries. Utilization of the staff for conducting treatment intervention, treatment outlets etc. are not being devised and communications channels passing through many stumbling blocks like limited human resource as compared to the area to be covered while ensuring the participation of the secondary stakeholders and in this respect the peer education has not recorded positive gains. An added dimension has been the identification of possible healthy partners to the HIV infected so that a comprehensive strategy could be evolved.

- Behavior change communication, an approach that involved behavioral sciences, social learning, and persuasion to achieve realistic targets is the requisite.
- Emphasizes on audience involvement and participation throughout the Testing process is needed Etc.
- Recognized that behavior change is much a societal process as it is an individual decision making process supported by the circles and family.
- Appreciation of the crucial role of environment, involvement of stakeholders and peer/sibling involvement is required to capture attention, interest and most importantly emotions to make learning and change a pleasurable experience.

SAMIDA has been organized the advocacy meetings with different stakeholders in the target area. In these meetings we have been created the awareness for the project indicators. Mainly police people and local ICTC & ART counselors and also the PHC doctors for increase the services to the target community (HRGs) in the project area.

And also the staff members have visited the hot spot time to time to interact with the HRGs for their RMC & ICTC and RPR services remainder and condom distribution concerns. The visit time they provide the information regarding the all aspects to the HRGs. SAMIDA has conducted a Hot Spot level meeting with in deferent hot spots for the interaction one to on and one group metings to increase the report with HRGs.

CBS testing: - SAMIDA TI started Community Based HIV Screening tests to our target community & High Risk Behaviour community as per instructions APSACS. In this testing's campaign conducted to our SAMIDA-TI target 10 Mandals. We have conducted totally 40 camps and 2360 testing's and found 2 positives.

IEC ACTIVITY:- Conducted IEC activity's at Yellamanchilli & Narsipatnam sites with co-ordination of all line departments. We are distribution IEC materials & helath maxzines to our target community. And also create awareness on the Know Your status in the target area.

We have been organised the **World Aids Day** event is organized in Narsipatnam, Nakkapalli in Visakhapatnam District in which conducted the public meeting and rally at Narsipatnam, Nakkapalli with the college students and SHG women, Youth and also Target community of the TI project and local area hospitals staff (medical department) and our organisation staff and volunteers. The meetings have focused on creating awareness on preventing the HIV/AIDs and how to reduce the HIV infections and also the support services of the government.

In the event SAMIDA Targeted intervention staff members distributed IEC materials to all the participants. Based on the event SAMIDA providing the nutrition support to the People Living with HIV/AIDS. SAMIDA was donates the nutrition like rice, daal, oil, bed-sheets to the PLHAs of our target Mandals.

We have been organised the Kalajata event in the rural areas for the creating awareness on the “0” new infection and other informatics sessions through the songs and Burrakatha through the folk media channels.

2. Skilling Community owned Promotion & Enhancement (SCOPE) model Skill Trainings to Under privileged Youth, Ananthagiri & Yellamanchili mandals Visakhapatnam, Andhra Pradesh, with the support of the Functional Vocational Training and Research Society (FVTRS) Bangalore

“Every nook and corner of the globe is aware of these inherent strengths of entrepreneurship towards spurring economic advantages. India has taken up some major leads in pitching entrepreneurship as the cure-all, and amidst this, all contributions towards unfurling the powers of this discipline have got to be paced up towards a vibrant social institution building which is laudable”.

The major segment is to mainstream them into the livelihoods mission and thereby on providing intuition and articulation to identified youth through SCOPE exercises to build and enhance their livelihoods. Skill development and developing pool of trained youth readying them for occupation enhancement without resorting to the migrations has been underway through this project for sustainable livelihood training the youth in skill trades and making the resource as applicable to churning out the living has been a marked feature of this project principal outcome and the intervening cross cuttings are education, enhanced open schooling, increased technical learning's in advanced institutions and certifications are all the major focus areas of this project.

The organization SAMIDA has been implementing the program for the tribal school dropout youth under SCOPE model skill development trainings to the tribal youth for their livelihoods enhancement and sustainable livelihoods creation. Under this program this year we have been covered the following trades identified in the village level through the village level skill development committee.

The skill development committee was undertaken the entire process in the village level and they have to maintain the skill training centers in the village level. They closely observe the trainees mind set and they made suggestions to the trainees as well as the vocational teachers who are in the master trainee in the trade wise and center wise.

Major outcomes SCOPE project as have been Already Reflects in:

- Application of skill and entrepreneurship based developments in small businesses and undertaken with the inputs given during the EDP programs
- Human Resource Development which is reflected in enhanced competencies of potential/existing entrepreneurs, ensured through innovation / skill enhancement / capacity building programs
- Increased incidence of New Enterprise Creation through entrepreneurship development programs
- Positive socio economic and environmental impact on account of jobs generated, wealth created and eco-friendly technologies adopted.
- Social change is conspicuous with the economic environment becoming upbeat and problem of migration becoming less intense.
- Decreased gender balance in the entrepreneurship models and thereby the aspiring girls getting a fair chance to deliver the goods and services
- Larger outreach to the adjoining areas enterprises through liaison for increased outreach and job/self-employment model creation

Under this process we have been organized the skill development plan preparation for the selected grama panchayaths (Clusters) in the target area. Base on the output of the skill development plan meetings we have prepare a details action plan for the trade wise skill trainings in the selected clusters.

Trade wise coverage in the year 2019-2020

| S. No | Trade | No trained | | Employment linkage | | Self-Employment | |
|-------|--|------------|-----------|--------------------|----------|-----------------|-----------|
| | | Male | Female | Male | Female | Male | Female |
| 1 | Garment making, | | 45 | | 9 | | 35 |
| 2 | Embroidery, Zari & Zardosi | | 20 | | | | 20 |

| 5 | Driving | 22 | 3 | 12 | | 10 | 3 |
| 6 | Carpentry | 30 | | | | 3 | 27 |
| 7 | Masonry | 20 | | | | | 20 |

Enterpreneur Development Program

We have been oriented to the trainees along with the skill trainings. The EDP & Life skill trainings which has given impetus to the functional partnership of FVTRS and the SAMIDA has commenced that has instilled the much needed social relations aspects and is a boon to the dropouts on the contemporary issues of embedding with social issues and adjustment aspects. With a commitment to impart social skills based employability trainings and towards institution building these have started at selected place with chosen topics through experienced resource persons and in this mission hereby the EDP is commenced at venue.

Creates a 'safe' environment, in which all staff members are treated equally and fairly, and in which they can perform to the best of their abilities. Understands and acting on the need of staff to be informed about issues that affect them personally and that affect the work unit. Conducts effective meetings and exhibits constructive communication outside the organizational unit. Communicate the reasoning for a decision. Demonstrate the ability to make difficult and/or sensitive decisions. Take decisions in a timely manner.

Made decisions in full knowledge of facts, laws and organizational rules and regulations, rational, timely and firm decisions, using advice-giving approaches where appropriate taking into account the organizational and individual short and long term consequences of decisions that demonstrated the required courage to take difficult or sensitive decisions and accepts full responsibility while ensuring that decision making criteria and reasons for decisions are communicated is all about EDP and this process is well accomplished setting the tone and tenor of timely completion and orienting the trainees on rational employability and modular skills.

3. RTP-AHF India Cares (Community based Rapid HIV Testing Program with the supported by the Aids Health Care Foundation- India Cares.

“The Strategic partnership plan of AHF and SAMIDA guides the organization’s testing and CBT initiatives to ensure the testing cascade is up and comprehension of set agenda. Towards this parity, that orchestrates the outreach to the diverse and most disadvantaged engages the organizations efforts for translating goal realization by 2020 and by 2032 into action oriented cataloguing. Hence the following annual report recapitulates the parameters through which the testing scenario is drastically transformed to reach out to the far off villages and most shyly populace to the embrace of solace and confidence building and how it contributed to HIV and AIDS in 2017 and reviews the impact of these accomplishments”

Overview of the RTP program

The year 2019-2020 represented a transition in many ways for the response. The positive developments have been recorded and significant shift in the attitudes of the people have been recorded through coordinated action strategies and the innovative simple means to accelerate the testing algorithms have bearing on this scenario and 8370 tests were completed and 97 cases (positives) have been recorded though a little more than the targets, yet when the sensitivity is pouring in the efforts have been put in the right direction to record and link them to the nearest facilities. 118 People have availed the linkages out of total tested of 6590 which corresponds to little more than 25% to 30% of the people tested. These achievements are remarkable by any standard. But the urgency and need to do more, and more quickly, is clear when other critical epidemiological trends are considered

Before the event SAMIDA has been organized free HIV testing camps in the 10 villages in the Visakhapatnam District and completed 500 HIV screening tests and Identified 5 PLHIVs in the camps and in the process of the campaign. After Identified all the 5 PLHIVs are linked in to the ICTC and also ART centers. During the 10days campaign period SAMIDA team have been organized the awareness camp and rally in the village level and create some awareness on HIV/AIDs.

4. Street to School (Children Sponsorship) Care & Share Italy

➤ Community Sponsorship Programme (Financial Support for Education)

The cost of living is skyrocketing and the standard of living for the below poverty line masses is going down and people living in the slums are daily wage workers struggle to feed their families and educating the children is a mire. Municipal schools lack minimum facilities and children are left to themselves without supervision lead to low enrolment and high dropout rates. Under this Street to School Program we intend to support the education of children in the slum areas of Vijayawada city for their better academic performance

➤ Our services under Community Sponsorship Program:

- The Communities would be helped with admissions in to educational institutions.
- The Communities would be provided school and college fee, books, book bags and uniform.
- Our local staff will be in regular contact with the Community and his family.
- We will be in regular contact with the educational institutions where our Communities study to monitor educational performance of our sponsored Communities.
- The children would be given career guidance classes.
- The children would be encouraged to participate in extracurricular activities of the schools.
- The Community Sponsorship Programme focuses on the education and care of Community and destitute children and of low income families. The sponsorship fee is utilized for school fees, hostel fees, books, uniform, clothes and medical expenses.

Community Sponsorship Programme (SSP) is mainly about identifying high potential young people from disadvantaged backgrounds and circumstances and affording them the opportunity to realize their potential in educational. We also admit children in boarding homes and colleges where there is no possibility for them to remain at home and continue their studies.

➤ **Geographical coverage of the organization**

Sanga Mithra Development association (SAMIDA) is a development support organization working for the Community and disadvantaged people to working in Vijayawada, Machilipatnam, Nuzvid, Agiripalli, Musunuru, Chatrai, Visannapeta, Konduru, Thiruvuru, Visakhapatnam and also at Vijayanagaram & East Godavari Districts of A.P. The extended areas of the operations include East and West Godavari districts. But our main beneficiaries are situated in the districts of Krishna and Guntur.

According to Indian Government reports, around 60 million children between 5-15 years do not attend school. Either they are not enrolled by parents due to lack of money or they are enrolled in government schools but drop out because they have to earn for their family. SAMIDA started with the non-formal education of handful of children in a slum and has today touched the lives of more than 1250 people from different age, social and financial backgrounds.

Promotion of the Vocational Education & Community development

SAMIDA provides a platform for vocational training to those Communities who show a lack of interest in formal studies or were dropouts from school. There is lot of unemployment due to most of the Communities opting for general subjects. Even after long of years of study and spending lot of money, the Communities do not acquire any specific skills. As a result, they do not find employment and again depend on their families for maintenance. But we at SAMIDA want the Communities to become financially independent and support their families. Hence we give importance to vocational education and training.

Communities Career Counseling

Career counseling is a process that helps the Communities to know and understand themselves and the world of work in order to make educational, career and life decisions. There are a number of factors like interests, abilities, values, personality, background, and circumstances that influence career development. Present day Communitys are under great stress due to several factors like low family income to support their studies, lack of proper facilities at home to study, lack of proper facilities in the schools, lack of trained and interested teachers, competition among the Communitys for ranks, lack of a specific goal in life. Majority of the Communitys do not know what subjects they should study and what career they should pursue. This situation of the Communitys calls for Community career counselling. If the stressful state of the Communitys is not properly addressed, it will have negative impact on their academic performance and their future life.

Communication between Children & their Sponsors

To improve their advocacy work regarding democratic rules, transparency and openness we at SAMIDA always ensure to have proper and direct communication between the sponsor and the child under COMMUNITY SPONSORSHIP PROGRAMME. This is an activity aimed at keeping the sponsors informed about the well-being of their Children like about their studies, Health, Needs and also a way to keep in touch with each other. This activity contains writing of two letters per each academic year from the child to sponsor. First Letter is generally written in the period of March to August and Second Letter is written during the period between Octobers to January.

5. Tribal Model school construction project

The model school construction at village Dekkapuram has been a step- forward venture in the Tribal Development Scenario and an eye opener to several of the development players that are as of now positioned in the Tribal development sector in these areas. As part of the local area education and sustenance development initiatives for continued education and children empowerment proportionate to the contemporary standards through promoting school complex with all the modern amenities and infrastructure is ne initiative.

SAMIDA have obtained support from the Mural Krishna Foundation which has been in queue for some period under their approach of “Establishing passage to children is an everlasting imprint on the social transformation and every penny spent will have millions in return”. The MKT has impacted several children through sponsorships in the state of AP at Vijayawada and now through this venture the construction initiative in tribal region has escalated and as is evident the present initiative has been the master minded endeavor to empower and show case the best result among the underprivileged sections of the society under local area infrastructure promotion building social capital. The core objectives of the program is

Strengthen the participation of youth and communities in building model school and improving quality education/learning. Build a model school which provides enabling and creative atmosphere for the tribal children to learn, play and enjoy their childhood. Enhance learning levels of children through quality education, extra-curricular and sports activities. Knowledge management and advocacy with the authorities for replication of such model schools in tribal areas

National Award facilitation

SAMIDA awarded to 5th National Indra Jith Kurana award in the year 2019-2020. The award was announced by the Ruchika Social Service Organisation- Bhubaneswar. The award ceremony held at Bhubaneswar.

The visit to the **Ruchika Social Welfare Organization** has been one Historic occasion to SAMIDA teams wherein we could really grasp the pulse of one “Real working Civil Society” deriving the good to masses of Odisha and projecting a role model to several others for replication and we could visit some of the working areas in and around Bhubaneswar Slum pockets.

We have been escorted by an experienced field work associate and experienced working members while on the field of M/S Ruchika Social Service Society at Bubaneswar, Odisha.

Our names are D.Veerabhadrarao, G.Annavaya Sarma and team of Sanga Mithra development Associates (SAMIDA), Visakhapatnam, Andhra Pradesh, the recipients of **5th Inderjit Khurana National Award-2019** for Social Development 2019, participated in the field visit assignment on 23rd and 24th of November 2019 which has been the High Profile field of slums of Bhubaneswar that has been excellent so on and so forth and the teams have appeared to be aware of slum geography and its economics, its background, preparation, interest in the topic with a planning for the slum improvement including objectives and activities. The visit has generated and fashioned rapport with slum dwellers and a pleasant learning environment.

We have prepared to reach the slum and introduced the agenda in an interesting and exciting way that made the objectives of the visit clear and showed creativity and resourcefulness in designing visits and selecting materials used and media resources effectively to understood subject matter.

6. Special programs conducted during the year 2019-2020

1. Anti-Child Labour Day

The anti-child Labour Day was organized by the SAMIDA in the project area. The event was organized with local SHG women and children in the Narsipatnam project office. The meeting was Started by the project director Sri D.Veerabhadrarao and the vice president Sri D.Srinivasarao. Based on the event we have been organized the rally and also awareness camp on the event theme in the Borra Village, Ananthageri mandal.

The program aims to improve the geographical representation of the organization SAMIDA, promote gender parity at professional level, create an enhanced pool of children enriching and diversifying children.

It is an opportunity to join mainstream efforts at the early stage of their career and hundreds of millions of girls and boys throughout are involved in work that deprives them of receiving an adequate education, health, leisure and basic freedoms, violating this way their rights. Of these children, more than half are exposed to the worst forms of child labour.

On this day the SAMIDA has organized the activity of identification of dropouts and never enrolled and the age groups of adolescents are organized to join the bridge courses and organized advocacy with shop owners and other stakeholders to campaign against the incidence of child labour that prevents their orderly growth and progress towards fulfilling their 4 basic rights.

2. Children's day

SAMIDA was organized the children day event at Dekkapuram Village in the Borra grama Panchayath. The chief guest of the event is the Surpanch Smt. D.Sundaramma and the village elders and local youth leaders. The children day is celebrated on 20th of Nov commemorating the birth anniversary of our first Prime Minister Late Pandit Jawaharlal Nehru. The United Nations' (UN) Universal Children's Day, which was established in 1954, is celebrated on November 14th each year to promote international togetherness and awareness among children worldwide. Major global variants include a Universal Children's Holiday on 14th November, by United Nations recommendation. In India, Children's Day is celebrated on 14 November, on the birthday of the first Prime Minister of independent India, who was fondly called Chacha Nehru (Uncle Nehru) or Chachaji (Uncle), and who emphasized the importance of giving love and affection to children, to give him tribute. After the death of Jawaharlal Nehru in 1964, it was unanimously decided to celebrate his birthday as BAL Diwas or Children's Day in India. The SAMIDA commemorating the special event has organized the BAL Diwas in the schools of Visakhapatnam Rural district and has organized several of the programs like paintings, essay competitions and to promote happiness of all children and to express gratitude toward mothers and parents.

Community participation

Getting tested which is not happening and being honest and open with one another makes it easier to talk about getting tested and getting on treatment are now open in the treatment retinue with community participation. Now target community is more compassionate in support and services where they're needed most. Through this streamlining the health and well-being of vulnerable youth and improving their ability to access HIV prevention services through innovative community-based approaches to HIV testing, linkage establishment and resultantly the prevention are sought after. AIDS free society is through combating pediatric HIV and promoting drug adherence. Providing opportunities to adolescent girls and young women in reducing devaluation because of gender bias, Social isolation, economic disadvantage, discriminatory cultural norms, orphan hood, gender-based violence, and school drop-out all contribute to girls' vulnerability to HIV.

General awareness camps

- **Water and sanitation & Safe drinking water**

The water and sanitation are the major chunk of initiatives includes the focused Areas of interventions on risks associated with water, sanitation and hygiene, malnourishment, Government interventions and their response in the area wise dissemination, critical health impacts both technical and operational in general and on pregnant & LM in particular, measures to be adopted by mothers to protect their wards – both conventional, occupational and water borne diseases, assessing nutrition required as benchmark for assessing the effectiveness of the available different water related programs, a valuable input in the campaign for the wider use of nutrition and precautions.

The Overall Objective of the programme is to improve access to safe drinking water, sanitation and hygiene for children, and women in operation villages through community empowerment and strengthening service delivery.

The Specific Results of the programme are

1. Community Participation: Awareness generation on safe drinking water, sanitation and hygiene through IEC campaigns and orientation to Mothers Committee members
2. Enhanced Capacity of village level Workers: Effective and responsive service delivery by Anganwadi Workers.
3. Effective Convergence between line departments and Health: ICDS and Health functionaries work in collaboration to deliver quality services.

- **Child rights awareness**

That the SAMIDA has got a decisive part of organizing the stakeholders in a spin around manifestation to find and look around for the child rights and education front segment and has tacit follow up of the decisive modes of working with Yelamanchilli Mandal stakeholders. Quality of engagement: from an intervention perspective, it is also important that the point of access provides an environment for child rights where the operational regions has the time and inclination to engage in depth with the programme. Line department swelled obstacles: The child rights development work is to be manned suitably since the necessary permissions have to be gotten from the higher ups and their volition is required

In the line of order the participation level of the stakeholders, community level committees, SMC/MC, PRI, line departments in the mainstreaming of child rights is very promising and awareness levels are increasing as well as inducting other players into the program which is apparent with the regular follow up and response of government and all the necessary parameters that are associated with the effective criterion of successful association. Involvement of community in the process is feasible on account of motivation drive and the interaction with the village stakeholders and intervention with education or government variable impacts.

Wider consultative round table are held with the stakeholders, shop owners who are employing the children and organized the village level networks for support structures, parleys with the revenue, Panchayath and Mandala level institutions. The community level interactions are held during the operation research and validation interactions for enhancing the community level participation, ownership and sensitization.

- **Awareness on RtE**

The right to awareness on entitlements on account of RtE is closely related to the education system is under which is under intense stress with the majority of the children coming from extremely marginalized communities getting affected by barriers, migration and resettlement due to slum and

resettlements and thereby the marginalization. There is ever growing demand for entitlements as per the act and here the SAMIDA has a decisive role to play in the unorganized and private sectors schools but adequate awareness is not matching the enactment requirement. It is just and need to generate the awareness and sensitize the communities on the match to the requirement in the communities and matching the set requirements of provision of entitlements. The low capacity is featured with low level of awareness, low investment capabilities, unaware of application of appropriate people organization for entitlements sustainability both in schools as well as in the communities for the participatory research outputs and here the SAMIDA has been playing an important role in providing inputs in the RTI enactment and providing suitable inputs both the education department through round tables and consultations.

- **Awareness on RTI**

The RTI Programme a unique tripartite initiative of the Government of India calling for application of diligence and due observation of the citizens right to observe the social and SAMIDA facilitation in community sectors for Open Innovation and pose challenge to take lead role in obtaining the information and here where supporting the Government of India's missions of right information in the right place enhances the Indian social ecosystem by enabling communities through the stages of ideation, innovation and acceleration, to develop information-based solutions for tomorrow and the organization is a lead role in making the awareness through various round tables, consultations, school level campaigns and unions level part play is evident and making the initiative more visible and gigantic.

Conclusions

An energetic and talented working development professional group with innate abilities to build social justice and equanimity through development research, Program Planning, strategy building, resource mobilization studded with Passion, self-motivation with a drive of organizational skills and proactive approach of accuracy are the specifics. The staff are actively involved in highlighting the development issues to provide required direct and indirect reinforcements of capacity building, community mobilization, institution development to the vulnerable communities in rural, urban and tribal contexts and initiating action strategies to facilitate them to redeem their vulnerabilities with an amalgamation of academic and research bent and applying the contemporary inputs and the present avocations include environment, water resource management, bio-diversity, climate change and preparedness during natural disasters.
